

Which type of registration?

Introduction

In the guidance document 'Which type of account', you find more explanation about the types of account you can create and the consequences it has for the types of registration you can submit.

A foreign supplier can submit only one type of registration, namely the inverse (of the limited) registration.

A registrant or a representative however, can submit different types of registration, depending on whether the registration concerns

- a substance or a mixture
- a first registration or an annual update
- a registration using a previous registration number
- a product which is used exclusively within the framework of scientific research and development or within the framework of product and process oriented research and development

The answer to which type of registration you have to submit, and which annex of the Royal Decree is applicable, is given in the [scheme below](#).

Foreign supplier : Inverse (of a limited) registration

Within the account for a foreign supplier, you will only be able to make registrations of the 'inverse' type. This type of registrations asks only the information described in section 2 of annex 1 or annex 2 of the Royal Decree. The foreign supplier registers on a voluntary basis. He will receive a registration number, which he transfers to his customers. These customers can then use the option of the 'limited' registration.

Registrant – representative : decision tree

The decision tree exists out of 8 questions. Depending on the answer you give to a specific question, you will receive an answer to the question which type of registration you have to submit or will be referred to the next question.

Question 1:

I want to submit a first registration or an annual update?

If the answer to this question = **first registration**, go to [question 3](#).

If the answer to this question = **annual update**, go to [question 2](#)

Question 2:

I want to submit the annual update for a substance or a mixture?

If the answer to this question = **substance**, you will have to provide the information asked in annex 3 of the Royal Decree.

If the answer to this question = **mixture**, you will have to provide the information asked in annex 4 of the Royal Decree.

Question 3:

I want to register a product which is used exclusively for scientific research and development or product and process oriented research and development (cfr. Art 7 of the Royal Decree) ?

If the answer to this question = **yes**, you can use a simplified registration. This means that only the information asked in annex 6 of the Royal Decree has to be given. The registrant has to provide an affidavit, signed by the persons responsible for the scientific research and development, or product and process oriented research and development, that the substances shall not be placed on the market. This document has to be provided for every person who acquires the substance or mixture from the registrant.

If the answer to this question = **no**, go to [question 4](#)

Question 4:

I want to submit the registration for a substance or a mixture?

If the answer to this question = **substance**, go to [question 5](#)

If the answer to this question = **mixture**, go to [question 6](#)

Question 5:

I have a previous registration number for my substance (cfr. Art 8 of the Royal Decree)?

If the answer to this question = **yes**, you can use the option of a limited registration. You have to provide the information asked in annex 1 of the Royal Decree, but you can use the previous registration number to replace the information asked in section 2 of annex 1.

If the answer to this question = **no**, you will have to provide the information asked in annex 1 of the Royal Decree.

Question 6:

I have one or more previous registration number(s) for my mixture (cfr. Art 8 of the Royal Decree)?

If the answer to this question = **yes**, go to [question 7](#)

If the answer to this question = **no**, you will have to provide the information asked in annex 2 of the Royal Decree.

Question 7:

I have a previous registration number for the mixture itself (cfr. Art 8 of the Royal Decree)?

If the answer to this question = **yes**, , you can use the option of a limited registration for the entire mixture. You have to provide the information asked in annex 2 of the Royal Decree, but you can use the previous registration number to replace the information asked in section 2 of this annex.

If the answer to this question = **no**, go to [question 8](#)

Question 8:

I have a previous registration number for all the substances in the mixture (cfr. Art 8 of the Royal Decree)?

If the answer to this question = **yes**, , you can use the option of a limited registration for the substances in the mixture, but not for the mixture itself. This means you have to define the mixture, but at the level of the details of the substances, you can use the previous registration number to replace the information asked in section 2 of annex 2.

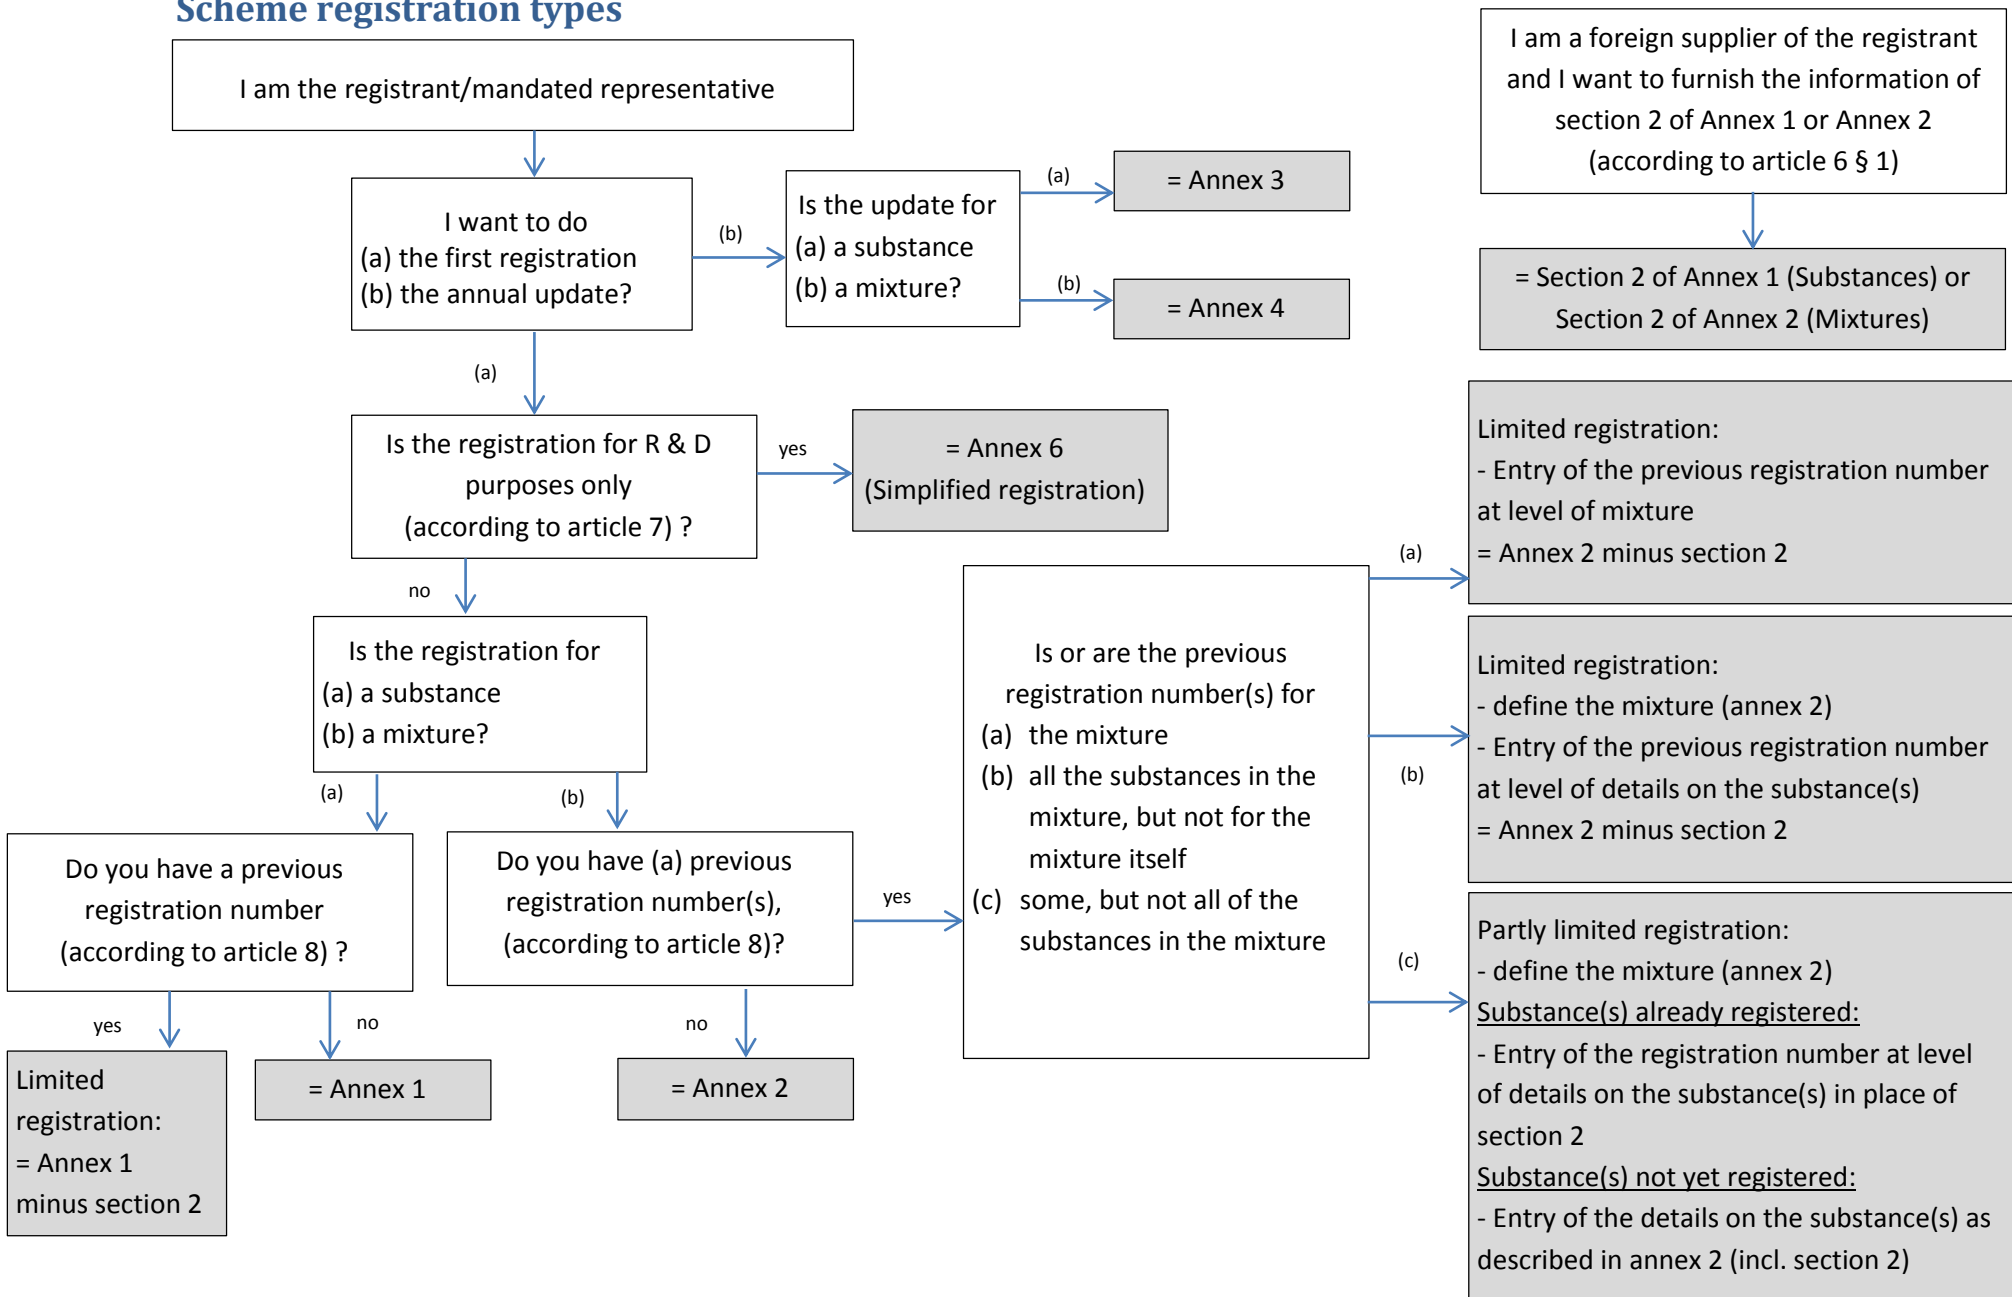

If the answer to this question = **no**, meaning you have a previous registration number for one or more substances in the mixture, but not for all the substances in the mixture, you can partly use the option of a limited registration. You have to define the mixture, and at the level of the details of the substances:

- you can use the relevant previous registration number(s) for the substance(s) already registered, to replace the information asked in section 2 of annex 2
- you have to provide the information asked in annex 2 for the substance(s) not yet registered.

More info about the limited registration and the previous registration number?
