Initial as the first exam after age 40

Initial

If medically indicated

< 30 years → 5 yearly
 30-39 years → 2 yearly
 40-49 years → every year
 ≥ 50 years → every examination

≥ 50 years → 2 yearly

Then: If medically indicated

LIPID PROFILE

Initial
Then: 40 years

If medically indicated

AUDIOGRAM

Initial

Initial if IR [1]

< 40 years → 5 yearly
 ≥ 40 years → 2 yearly

< 40 years → 5 yearly
 ≥ 40 years → 2 yearly

If medically indicated

PULMONARY FUNCTION TEST

Initial
Then: If medically indicated

If medically indicated

URINANALYSIS

Every examination

EXTENDED OTORHINOLARYNGOLOGY

Initial - Then: If medically indicated

[1] The instrument rating (IR) allows pilots to control their aircraft without external visual information. The flight is thus conducted using the aircraft's instruments and air traffic control. An aircraft or helicopter pilot can then fly in conditions where flying using external visual references is unsafe, for example in difficult and adverse weather conditions.
