APERÇU DU CHAPITRE

ICD-10-CM et ICD-10-PCS ont été développées pour remplacer ICD-9-CM

La date planifiée pour l'implémentation de ces 2 classifications en Belgique est le 1 janvier 2019.

Le changement vers ICD-10 est nécessaire pour diverses raisons dont les suivantes :

- La classification ICD-9-CM est limitée dans sa capacité à inclure de nouvelles technologies.
- Une fois qu'une catégorie d'ICD-9-CM est complète, différents types de diagnostics ou interventions doivent être classés dans le même code pour sauver de l'espace.
- Beaucoup d'autres pays dans le monde ont déjà fait ce passage. Cette situation rend difficile les comparaisons des données de santé des USA avec celles du reste du monde.
- L'implémentation d'ICD-10-CM et ICD-10-PCS pourrait augmenter la qualité des soins et la sécurité des patients, ainsi qu'augmenter la fluidité du processus de remboursement.
- Chaque application et base de données dans lesquelles les diagnostics ou interventions sont introduits, stockés, analysés ou rapportés utiliseront ce nouveau système de classification.

Introduction

service public fédéral

SANTÉ PUBLIQUE, SÉCURITÉ DE LA CHAÎNE ALIMENTAIRE ET ENVIRONNEMENT

Manuels: règles de codage

Concepts de base

Codes combinés

Fond du texte

de classer plus précisément. Occasionnellement, ces codes sont combinés en un seul code.

Les codeurs doivent comprendre les principes de base qui soutiennent le système de classification afin d'utiliser ICD-10-CM et ICD-10-PCS de manière appropriée et efficace. Cette connaissance est également élémentaire pour comprendre et appliquer les conseils officiels de codage fournis par 'AHA Coding Clinic (American Hospital Association)'. Il est important que les codeurs de toutes les institutions de soins soient au courant des règles officielles d'ICD-10-CM concernant le codage et le rapportage ainsi que des conseils de codage.

DÉVELOPPEMENT D'ICD-10-CM

service public fédéral

SANTÉ PUBLIQUE, SÉCURITÉ DE LA CHAÎNE ALIMENTAIRE ET ENVIRONNEMENT

Manuels: règles de codage

EXERCICE 1.1

Sans vous référer au manuel ni aux livres ICD-10-CM ou ICD-10-PCS, indiquez si les affirmations suivantes sont vraies (T) ou fausses (F).

ICD-10-CM comprend les codes des diagnostics et des interventions.

La date d'adoption d'ICD-10-CM et ICD-10-PCS en Belgique est le 1 janvier 2015.

Des catégories à 3 caractères sont utilisées dans ICD-10-CM et 7 caractères dans ICD-10-PCS.

ICD-10-CM et ICD-10-PCS sont tous deux développés par l'OMS.

ICD-10-CM et ICD-10-PCS ont été développés car ICD-9-CM est dépassé et comprend des contraintes numériques.

SOLUTIONS EXERCICE 1.1

Sans vous référer au manuel ni aux livres ICD-10-CM ou ICD-10-PCS, indiquez si les affirmations suivantes sont vraies (T) ou fausses (F).

ICD-10-CM comprend les codes des diagnostics et des interventions.

F

La date d'adoption d'ICD-10-CM et ICD-10-PCS en Belgique est le 1 janvier 2015.

T

Des catégories à 3 caractères sont utilisées dans ICD-10-CM et des codes à 7 caractères dans ICD-10-PCS.

T

ICD-10-CM et ICD-10-PCS sont tous deux développés par l'OMS.

F

ICD-10-CM et ICD-10-PCS ont été développés car ICD-9-CM est dépassé et comprend des contraintes numériques.

T

Manuels: règles de codage

OBJECTIFS D'APPRENTISSAGE

Après l'étude de ce chapitre, vous devez être capable de :

- Expliquer les améliorations qui font que le système ICD-10 est plus efficace et plus utile qu'ICD-9-CM.
- Expliquer pourquoi le changement vers ICD-10-CM et ICD-10-PCS sera bénéfique.

TERMES

ICD-10-CM

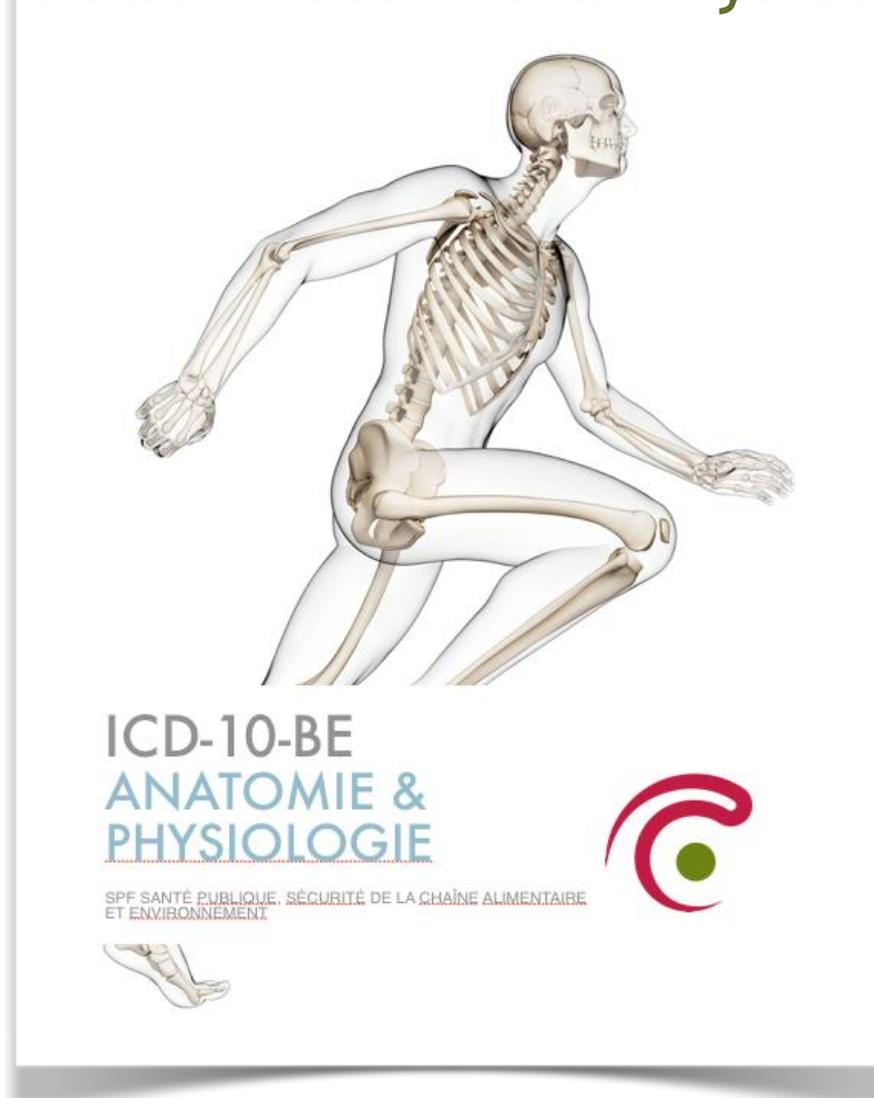

Classification Internationale des Maladies, 10^{ème} révision, Modification Clinique ; contient les codes des diagnostics.

ICD-10-PCS

Classification Internationale des Maladies, 10^{ème} révision, Système de Classification des Interventions ; contient les codes des interventions.

Manuels: Anatomie & Physiologie

Organization of Chapter 2

Chapter 2 in ICD-10-CM classifies neoplasms. This chapter includes categories C00 through D49 arranged in the following blocks or sections.

Section	Section Title
C00–C14	Malignant neoplasms of lip, oral cavity and pharynx
C15–C26	Malignant neoplasms of digestive organs
C30–C39	Malignant neoplasms of respiratory and intrathoracic organs
C40–C41	Malignant neoplasms of bone and articular cartilage
C43–C44	Melanoma and other malignant neoplasms of skin
C45–C49	Malignant neoplasms of mesothelial and soft tissue
C50	Malignant neoplasms of breast
C51–C58	Malignant neoplasms of female genital organs
C60–C63	Malignant neoplasms of male genital organs
C64–C68	Malignant neoplasms of urinary tract
C69–C72	Malignant neoplasms of eye, brain and other parts of central nervous system
C73–C75	Malignant neoplasms of thyroid and other endocrine glands
C7A	Malignant neuroendocrine tumors
C7B	Secondary neuroendocrine tumors
C76–C80	Malignant neoplasms of ill-defined, other secondary and unspecified sites
C81–C96	Malignant neoplasms of lymphoid, hematopoietic and related tissue
D00–D09	In situ neoplasms

Lesson Quiz Completed

You have now completed the end of lesson quiz for ICD-10-CM Chapter 2.

Retaking the End of Lesson Quiz

If you would like to retake the end-of-lesson quiz, you may do so. You can take it as many times as you like, and no score will be recorded.

[> RETAKE the lesson quiz](#)

ICD-10-CM Chapter 2: Neoplasms Lesson Quiz Answer Key

Question 1: If a malignancy has been previously excised or eradicated and there is no further treatment of that site, what category is reported?	Correct answer: Z85	A code from category Z85 is assigned to indicate that the patient has a personal history of malignant neoplasm
Question 2: What code is assigned when the admission is for antineoplastic chemotherapy?	Correct Answer: Z51.11	Code Z51.11 is assigned as the principal diagnosis followed by neoplasm code.
Question 3: When a pregnant patient is treated for a malignancy, a code from which chapter is sequenced first - Chapter 2 or Chapter 15?	Correct Answer: Chapter 15	A code from Chapter 15 should be sequenced first, followed by a code from Chapter 2 according to Guideline I.C.2.l.3.
Question 4: When a patient is	Correct Answer:	According to Guideline I.C.2.c.1., the

Coding Case 1: Carcinoma with metastatic sites

The diagnosis for this 61-year-old female patient is small cell carcinoma of the right lower lobe of the lung with metastasis to the intrathoracic lymph nodes, brain, and right rib. What diagnosis codes are assigned?

(Type in your answers in the order listed here. When entering multiple codes, separate them with a comma and a space.)

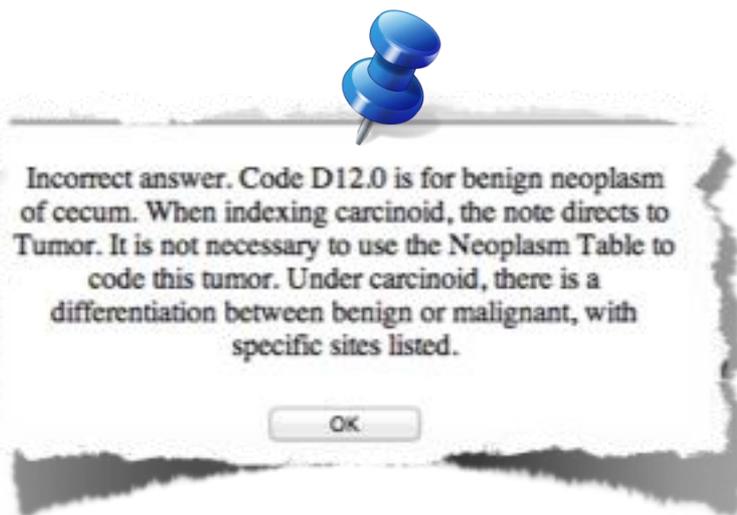

Question 5 of 5

Assign the codes for the following diagnosis: Benign carcinoid of the cecum.

- C18.0
- D01.0
- D12.0
- D3A.021

NOTE:

This is the FINAL question in the assessment. Before you submit the assessment, you may use the BACK button to review your answers. If you are ready to submit the assessment and receive your score, click the SUBMIT button after you select an answer for the question on this page.

Question 1

A 12-year-old presented to the emergency room with left ear pain after spending numerous hours in the family pool over the past week. The physician diagnosed the patient with swimmer's ear.

Assign the appropriate ICD-10-CM diagnosis code.
Your answer (correct): H60.332

Question 2

The patient is a 55-year-old Caucasian female who presents to the emergency room with vertigo over the last month. She has had vertigo symptoms mostly when lying down on her back. She gets a dizzy feeling which she describes as spinning and reports some decreased hearing and buzzing in the left ear. 1. Labyrinthine vertigo. Patient agrees to PT evaluation. Will try Antivert for spinning.

2. Headache with normal neurologic exam. ESR ordered to rule out temporal arteritis due to the location.

What are the appropriate ICD-10-CM diagnosis code(s)?
Your answer (correct): H81.02, R51

225		Section III. Reporting Additional Diagnoses									
229		Section IV. Diagnostic Coding and Reporting Guidelines for Outpatient Services									
251		Appendix I: Present on Admission Reporting Guidelines									
252											
253		Section I. Conventions, general coding guidelines and chapter specific guidelines									
254											
255		The conventions, general guidelines and chapter-specific guidelines are									
256		applicable to all health care settings unless otherwise indicated. The									
257		conventions and instructions of the classification take precedence over									
258		guidelines.									
259											
260		A. Conventions for the ICD-10-CM									
261											
262		The conventions for the ICD-10-CM are the general rules for use of the classification									
263		independent of the guidelines. These conventions are incorporated within the									
264		Alphabetic Index and Tabular List of the ICD-10-CM as instructional notes.									
265											
266		1. The Alphabetic Index and Tabular List									
267											
268		The ICD-10-CM is divided into the Alphabetic Index, an alphabetical list of									
269		terms and their corresponding code, and the Tabular List, a chronological list									
270		of codes divided into chapters based on body system or condition. The									
271		Alphabetic Index consists of the following parts: the Index of Diseases									
272		and Injury, the Index of External Causes of Injury, the Table of									
273		Neoplasms and the Table of Drugs and Chemicals.									
274											
275		See Section I.C2. General guidelines									
276

lower	C50.8-	C79.81	D05.-
lower-inner quadrant	C50.3-	C79.81	D05.-

Neoplasms (C00-D49)

Note: Functional activity

All neoplasms are classified in this chapter, whether they are functionally active or not. An additional code from Chapter 4 may be used, to identify functional activity associated with any neoplasm.

Morphology [Histology]

Chapter 2 classifies neoplasms primarily by site (topography), with broad groupings for behavior, malignant, in situ, benign, etc. The Table of Neoplasms should be used to identify the correct topography code. In a few cases, such as for malignant melanoma and certain neuroendocrine tumors, the morphology (histologic type) is included in the category and codes.

Primary malignant neoplasms overlapping site boundaries

A primary malignant neoplasm that overlaps two or more contiguous (next to each other) sites should be classified to the subcategory/code .8 ('overlapping lesion'), unless the combination is specifically indexed elsewhere. For multiple neoplasms of the same site that are not contiguous, such as tumors in different quadrants of the same breast, codes for each site should be assigned.

Malignant neoplasm of ectopic tissue

Malignant neoplasms of ectopic tissue are to be coded to the site mentioned, e.g., ectopic pancreatic malignant neoplasms are coded to pancreas, unspecified (C25.9).

Malignant neoplasms (C00-C96)

Malignant neoplasms, stated or presumed to be primary (of specified sites), and certain specified histologies, except neuroendocrine, and of lymphoid, hematopoietic and related tissue (C00-C75)

Malignant neoplasms of breast (C50)

C50 Malignant neoplasm of breast

Includes: connective tissue of breast

 Paget's disease of breast

 Paget's disease of nipple

Use additional code to identify estrogen receptor status (Z17.0, Z17.1)

Excludes1: skin of breast (C44.501, C44.511, C44.521, C44.591)

C50.0 Malignant neoplasm of nipple and areola

C50.01 Malignant neoplasm of nipple and areola, female

C50.011 Malignant neoplasm of nipple and areola, right female breast

C50.012 Malignant neoplasm of nipple and areola, left female breast

C50.019 Malignant neoplasm of nipple and areola, unspecified female breast

C50.02 Malignant neoplasm of nipple and areola, male

C50.021 Malignant neoplasm of nipple and areola, right male breast

C50.022 Malignant neoplasm of nipple and areola, left male breast

C50.029 Malignant neoplasm of nipple and areola, unspecified male breast

Injury, poisoning and certain other consequences of external causes (S00-T88)

Note: The chapter uses the S-section for coding different types of injuries related to single body regions and the T-section to cover injuries to unspecified body regions as well as poisoning and certain other consequences of external causes.

Note: Use secondary code(s) from Chapter 20, External causes of morbidity, to indicate cause of injury. Codes within the T section that include the external cause do not require an additional external cause code

Use additional code to identify any retained foreign body, if applicable (Z18.-)

Excludes1: birth trauma (P10-P15)
obstetric trauma (O70-O71)

Injuries to the elbow and forearm (S50-S59)

Excludes2: burns and corrosions (T20-T32)
frostbite (T33-T34)
injuries of wrist and hand (S60-S69)
insect bite or sting, venomous (T63.4)

S59 Other and unspecified injuries of elbow and forearm

Excludes2: other and unspecified injuries of wrist and hand (S69.-)

The appropriate 7th character is to be added to each code from subcategories S59.0, S59.1, and S59.2

- A - initial encounter for closed fracture
- D - subsequent encounter for fracture with routine healing
- G - subsequent encounter for fracture with delayed healing
- K - subsequent encounter for fracture with nonunion
- P - subsequent encounter for fracture with malunion
- S - sequela

S59.2 Physeal fracture of lower end of radius

S59.21 Salter-Harris Type I physeal fracture of lower end of radius

S59.211 Salter-Harris Type I physeal fracture of lower end of radius, right arm

S59.212 Salter-Harris Type I physeal fracture of lower end of radius, left arm

S59.219 Salter-Harris Type I physeal fracture of lower end of radius, unspecified arm

ICD10CM (2014)

Pregnancy, childbirth and the puerperium (O00-O9A)

Note: CODES FROM THIS CHAPTER ARE FOR USE ONLY ON MATERNAL RECORDS, NEVER ON NEWBORN RECORDS

Codes from this chapter are for use for conditions related to or aggravated by the pregnancy, childbirth, or by the puerperium (maternal causes or obstetric causes)

Trimesters are counted from the first day of the last menstrual period. They are defined as follows:

1st trimester- less than 14 weeks 0 days

2nd trimester- 14 weeks 0 days to less than 28 weeks 0 days

3rd trimester- 28 weeks 0 days until delivery

Use additional code from category Z3A, Weeks of gestation, to identify the specific week of the pregnancy

Excludes1: supervision of normal pregnancy (Z34.-)

Excludes2: mental and behavioral disorders associated with the puerperium (F53)

obstetrical tetanus (A34)

postpartum necrosis of pituitary gland (E23.0)

puerperal osteomalacia (M83.0)

Maternal care related to the fetus and amniotic cavity and possible delivery problems (O30-O48)

O42 Premature rupture of membranes

O42.9 Premature rupture of membranes, unspecified as to length of time between rupture and onset of labor

O42.92 Full-term premature rupture of membranes, unspecified as to length of time between rupture and onset of labor

Premature rupture of membranes after 37 completed weeks of gestation

service public fédéral

SANTÉ PUBLIQUE, SÉCURITÉ DE LA CHAÎNE ALIMENTAIRE ET ENVIRONNEMENT

Diseases of the circulatory system (I00-I99)

Excludes2: certain conditions originating in the perinatal period (P04-P96)
certain infectious and parasitic diseases (A00-B99)
complications of pregnancy, childbirth and the puerperium (O00-O9A)
congenital malformations, deformations, and chromosomal abnormalities (Q00-Q99)
endocrine, nutritional and metabolic diseases (E00-E88)
injury, poisoning and certain other consequences of external causes (S00-T88)
neoplasms (C00-D49)
symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified (R00-R94)
systemic connective tissue disorders (M30-M36)
transient cerebral ischemic attacks and related syndromes (G45.-)

Ischemic heart diseases (I20-I25)

Use additional code to identify presence of hypertension (I10-I15)

I21 ST elevation (STEMI) and non-ST elevation (NSTEMI) myocardial infarction

Includes: cardiac infarction
coronary (artery) embolism
coronary (artery) occlusion
coronary (artery) rupture
coronary (artery) thrombosis
infarction of heart, myocardium, or ventricle
myocardial infarction specified as acute or with a stated duration of 4 weeks (28 days) or less from onset

Use additional code, if applicable, to identify:

exposure to environmental tobacco smoke (Z77.22)
history of tobacco use (Z87.891)
occupational exposure to environmental tobacco smoke (Z57.31)
status post administration of tPA (rtPA) in a different facility within the last 24 hours prior to admission to current facility (Z92.82)
tobacco dependence (F17.-)
tobacco use (Z72.0)

Excludes2: old myocardial infarction (I25.2)
postmyocardial infarction syndrome (I24.1)
subsequent myocardial infarction (I22.-)

I21.0 ST elevation (STEMI) myocardial infarction of anterior wall

I21.01 ST elevation (STEMI) myocardial infarction involving left main coronary artery

I21.02 ST elevation (STEMI) myocardial infarction involving left anterior descending coronary artery

ST elevation (STEMI) myocardial infarction involving diagonal coronary artery

I21.09 ST elevation (STEMI) myocardial infarction involving other coronary artery of anterior wall
